

QHSE FOR SAFER OPERATIONS

QHSE is one of our key focus areas. Odfjell Drilling has adopted a "zero fault philosophy" as the main goal for our QHSE management system. The objective is to achieve a zero fault environment. The interaction between human, technological and organizational factors is taken into consideration in all project execution. The company has highly qualified and motivated employees with a wide range of competencies.

ODFJELL DRILLING TECHNOLOGY

ODFJELL DRILLING TECHNOLOGY

Serving clients all over the world

Odjfell Drilling Technology has over 35 years experience of developing and delivering solutions and services for the offshore drilling industry. The company has an established competence in the field of new, latest-generation Mobile Offshore Drilling Units, Offshore Platforms, drilling facilities design, engineering and project management.

Our capability is further enhanced by highly qualified engineers within drilling & well management, marine & subsea and maintenance & consultancy.

Odjfell Drilling Technology (ODT) is recognized as a leader in Drilling Facilities and Systems Engineering, with more than 450 employees in Norway, the UK, South Korea, the Philippines, Brazil and the Middle East. This enables us to serve clients all over the world.

ODT's services range from stand-alone consultancy to field development support, including front-end engineering design, detail engineering design, construction and m.c. support, hook-up, commissioning & operations support and well management. These services put HS&E and the end user at the forefront at every stage of its activities.

Perfecting operations

Our approach to management systems is a combination of innovation, experience, technology and rigorous standards. The purpose is to apply the "zero fault philosophy" to every area of our activities. ODT management systems are backed up by international recognition and full accreditation.

This structured approach ensures that projects are successfully completed to the customer's satisfaction within the agreed schedule and

budget. Furthermore securing that every team adopts and follows the company's project philosophies for HS&E and Operations, maximising the integration and input of its various Operational Groups.

Continuous Improvement through Integrated Operations

ODT has a business focus on continuous improvement through Integrated Operations (IO). We believe that IO is the concept of utilising technology to improve and optimize existing work processes and organisation. Thus IO is not about technology alone, but it is the way we work. ODT strongly believes that the key to success is to continuously challenge existing work processes and organisation in order to remain a preferred supplier of engineering and technology services.

ODT has implemented a number of innovative solutions to our products and services. Through concurrent engineering, 24/7 worldwide services, and an extended use of collaborative environments, ODT can ensure quality and cost effective services.

"Our goal is to be the preferred supplier of drilling-related competencies for our customers. With our projects, staff and services, we will achieve and meet their expectations and requirements"

Meeting tomorrow's challenges

Odjfell Drilling has a vision of creating the ultimate team to meet tomorrow's challenges. Building on experience, the company's 2,700 motivated and dedicated employees have been delivering high-quality services and added value to the offshore oil industry for more than 35 years. Since its start-up in the early 1970s, Odjfell Drilling has been a front-runner with respect to health, safety, the environment and technology, and the company is recognized as a quality drilling, engineering and well service contractor.

Through our technology and well service divisions, the company offers extensive technological know-how and a wide range of services to the petroleum industry.

An advantageous job opportunity

Our business is constantly growing and employs operational personnel, engineers and administrative staff to support its activities in the North Sea and around the world. In order to ensure a robust organization prepared for further growth, the company is continuously working to be a preferred employer, for both current employees and new recruits. Odjfell Drilling seeks people with the right attitude and we believe that enthusiastic people make the difference. If you choose a career with Odjfell Drilling, you can expect the support of a dedicated team of experts, who will appreciate your talent and help you to maximize your potential. Performance is not only about delivering - what you deliver is just as important.

Odjfell Drilling offers:

- Exciting job opportunities in diversified business areas and in many countries around the world.
- Challenging tasks based on the company's commitment to being a leading player in drilling operations and technology.
- A large internal job market offering many career opportunities both onshore and offshore.
- Competitive salaries, good pension and insurance schemes and an attractive welfare package.
